

Canon RF 50mm Lens

Price: PKR 62,000

Key Features

- Compact and Lightweight Design for Portability
- STM (Stepping Motor) for Smooth and Quiet Autofocus
- Super Spectra Coating for Reduced Flare and Ghosting

Complete Description

The Canon RF 50mm lens is a high-performance prime lens designed for Canon RF-mount mirrorless cameras. Its compact and lightweight design makes it easy to carry for everyday photography, street, portrait, and travel shooting.

Equipped with an STM (Stepping Motor), this lens delivers smooth and silent autofocus, perfect for both photography and video recording. The Super Spectra Coating reduces lens flare and ghosting, ensuring high-quality images with excellent contrast and color fidelity.

Additional Highlights

- Ideal for portrait, street, travel, and general photography
- High optical performance with sharpness and clarity across the frame
- Durable construction suitable for frequent use
- Fast and accurate autofocus for both stills and video
- Excellent bokeh for creative depth-of-field effects
