

Audio-Technica AT2020 Condenser Microphone

Price: PKR 33,000

Key Features

- Cardioid Polar Pattern
- High SPL Handling
- Clear Vocal Reproduction

Complete Description

The Audio-Technica AT2020 Condenser microphone is designed for high-quality vocal and instrument recording. Its cardioid polar pattern ensures focused sound capture while rejecting off-axis noise, making it ideal for studio recording and podcasting.

With high sound pressure level (SPL) handling, the AT2020 captures both soft and loud sources without distortion, providing clear and natural audio. It is suitable for vocalists, podcasters, and musicians seeking professional sound at an affordable price.

Additional Highlights

- Low self-noise for clean recordings
- Rugged construction for durability and reliability
- Compatible with standard XLR interfaces
- Ideal for home studios, project studios, and content creation
- Easy to set up and use for beginners and professionals alike
