

Ultraviolet (UV) Filters

Price: PKR 35,000

Key Features

- Protects Lens from Dust, Scratches, and Damage
- Absorbs Harmful Ultraviolet (UV) Rays
- Multi-Coated for Reduced Flare and Ghosting

Complete Description

Ultraviolet (UV) filters are essential accessories for photographers who want to protect their camera lenses and enhance image quality. They act as a protective layer over the lens, preventing dust, dirt, scratches, and potential damage.

In addition to physical protection, UV filters absorb harmful ultraviolet rays, which can cause haziness and reduce image clarity. The multi-coating technology minimizes lens flare and ghosting, ensuring high-contrast, sharp, and clear images even in bright lighting conditions.

Additional Highlights

- Compatible with various lens diameters and types
- Lightweight and easy to attach or remove
- Helps maintain lens cleanliness and longevity
- Enhances overall image quality in outdoor photography
- Essential for landscape, travel, and outdoor shooting
