

# Audio-Technica ATH-M20x Headphones

**Price:** PKR 15,000

## Key Features

- Closed-Back Design for Noise Isolation
- Flat Sound Profile for Accurate Monitoring
- Comfortable Ear Pads for Long Sessions

## Complete Description

The Audio-Technica ATH-M20x headphones are designed for professional and home studio use, offering accurate sound reproduction and excellent isolation. The closed-back design reduces ambient noise, allowing users to focus on their recordings or mixes.

Featuring a flat sound profile, the ATH-M20x provides a true representation of audio, making it suitable for monitoring, mixing, and casual listening. Comfortable ear pads ensure extended use without discomfort, perfect for long recording or editing sessions.

## Additional Highlights

- Lightweight and durable for long-term use
- Ideal for studio monitoring, podcasting, and mixing
- Collapsible design for easy storage and portability
- High-quality drivers for detailed audio
- Suitable for both professional and beginner users
