

Behringer UMC22 Audio Interface

Price: PKR 22,000

Key Features

- XLR/Line Combo Input
- Direct Monitoring Capability
- Budget-Friendly and Compact Design

Complete Description

The Behringer UMC22 is a versatile audio interface designed for home studios, content creators, and musicians seeking quality audio on a budget. It features a combo XLR/Line input for microphones or instruments, allowing flexible recording options.

With direct monitoring, users can listen to their input signal in real time without latency, ensuring precise tracking and performance. The UMC22 is USB-powered and compact, making it easy to integrate into any recording setup.

Additional Highlights

- High-quality preamp for clear and detailed audio
- Compatible with most DAWs and recording software
- Simple plug-and-play setup for PC and Mac
- Lightweight and portable for on-the-go recording
- Ideal for vocals, instruments, podcasts, and streaming
