

# Shure SM7B Dynamic Microphone

**Price:** PKR 145,000

## Key Features

- Dynamic Cardioid Microphone
- Built-in Pop Filter
- Optimized for Vocals

## Complete Description

The Shure SM7B Dynamic microphone is a professional-grade microphone designed for studio recording, broadcasting, podcasting, and vocal performances. Its dynamic cardioid pattern provides excellent rejection of off-axis sound, isolating the main sound source for clear, focused audio.

The integrated pop filter reduces plosive sounds, while the robust construction ensures durability and long-term reliability. The SM7B is renowned for its warm, natural vocal reproduction, making it a favorite among professional singers, podcasters, and voice-over artists.

## Additional Highlights

- Ideal for vocals, speech, and broadcasting
- Resistant to electromagnetic hum from computer monitors and other devices
- Smooth, flat, wide-range frequency response for professional audio capture
- Compatible with standard XLR interfaces and microphone stands
- Trusted by studios, podcasters, and recording professionals worldwide
