

Pop Filter (PSA1 Kit)

Price: PKR 6,500

Key Features

- Dual-Layer Mesh for Effective Plosive Reduction
- Compatible with Boom Arms
- Studio-Quality Sound Improvement

Complete Description

The Pop Filter PSA1 Kit is designed to improve the quality of vocal recordings by minimizing plosive sounds and breath noise. Its dual-layer mesh construction ensures smooth audio capture while protecting microphones from harsh bursts of air.

The filter easily attaches to standard boom arms, making it convenient for studio setups, podcasting, streaming, and voice-over recording. This accessory enhances audio clarity and provides a professional recording environment.

Additional Highlights

- Reduces 'p' and 'b' plosives effectively
- Lightweight and adjustable for optimal positioning
- Suitable for home studios and professional setups
- Durable construction for long-term use
- Compatible with most standard microphones and boom arms
