

AT2040 Dynamic Microphone

Price: PKR 69,000

Key Features

- Hyper-Cardioid Polar Pattern
- Optimized for Voice Recording
- Durable Shockmount Included

Complete Description

The AT2040 Dynamic microphone is designed for professional voice recording, offering a hyper-cardioid polar pattern that provides excellent isolation from background noise. This makes it ideal for podcasting, broadcasting, streaming, and studio recording.

The microphone comes with a durable shockmount, reducing vibrations and handling noise for clean, professional audio. Its robust construction ensures long-lasting performance, while the voice-optimized design ensures clear and natural sound reproduction.

Additional Highlights

- Suitable for home studios, professional studios, and live streaming
- Smooth, warm vocal response for spoken-word applications
- High-quality dynamic capsule for reliable performance
- Compatible with XLR interfaces and standard microphone stands
- Easy to set up and use for beginners and professionals alike
