

Systematic S-3 Tripod

Price: PKR 150,000

Key Features

- Carbon Build
- High Load Capacity
- Professional Stability

Complete Description

The Systematic S-3 tripod is a premium, professional-grade tripod designed for photographers and videographers who demand maximum stability and durability. Its carbon build provides a lightweight yet strong structure capable of supporting heavy camera setups with ease.

This tripod is engineered for professional stability, ensuring steady shots in studio and outdoor environments. With high load capacity, it can support large DSLR, mirrorless, and medium format cameras without compromising performance.

Additional Highlights

- Adjustable leg angles for uneven terrain
- Quick and secure leg locks for efficient setup
- Compact folding design for portability
- Ideal for landscape, studio, and professional photography
- Durable construction for long-lasting use
