

Shure SM58 Microphone

Price: PKR 25,000

Key Features

- Dynamic Handheld Vocal Microphone
- Cardioid Polar Pattern
- Industry Standard for Live Vocals

Complete Description

The Shure SM58 is a professional dynamic handheld microphone widely recognized as the industry standard for live vocal performances. Its cardioid polar pattern effectively isolates the main sound source while minimizing background noise, providing clear and consistent sound quality.

Designed for durability, the SM58 is built to withstand the rigors of touring, stage performances, and regular use. Its tailored frequency response emphasizes vocals, ensuring that performances sound natural and powerful.

Additional Highlights

- Reliable and rugged design for long-term use
- Smooth, natural sound for vocals and speech
- Resistant to handling noise
- Ideal for live performances, public speaking, and studio use
- Compatible with standard microphone stands and clips
