

Panasonic S5

Price: PKR 119,999

Key Features

- 24.2MP Full-Frame Sensor
- High-Resolution Mode
- Advanced Video Capabilities

Complete Description

The Panasonic S5 is a versatile full-frame mirrorless camera designed for both photographers and videographers. Featuring a 24.2MP full-frame sensor, it delivers exceptional image quality with excellent dynamic range and low-light performance.

The high-resolution mode allows photographers to capture ultra-detailed stills, ideal for landscape and studio photography. The camera also offers a wide array of video capabilities, including 4K recording at various frame rates, making it suitable for professional video production and cinematic content.

The S5 includes advanced autofocus features, in-body image stabilization, and dual native ISO for superior performance in challenging lighting conditions. Its lightweight and compact design makes it highly portable while maintaining professional-grade functionality.

Additional Highlights

- 5-Axis In-Body Image Stabilization (IBIS)
- Dual Native ISO for excellent low-light performance
- 4K 60fps 10-bit video recording
- V-Log and HLG recording profiles for cinematic color grading
- Fully articulating LCD touchscreen
- Durable, weather-sealed body
- Supports a wide range of L-mount lenses
- Built-in Wi-Fi and Bluetooth for remote control and file transfer
