

# Fujifilm X-H2S

**Price:** PKR 90,000

## Key Features

- X-Processor 5
- High-Speed Shooting
- 7-Stop In-Body Image Stabilization (IBIS)

## Complete Description

The Fujifilm X-H2S is a high-performance mirrorless camera designed for professional photographers and videographers seeking speed, precision, and image quality. Powered by the X-Processor 5, the camera offers extremely fast image processing, enabling high-speed continuous shooting and responsive performance.

The X-H2S excels in capturing fast-moving subjects with minimal blur thanks to its high-speed autofocus and continuous shooting capabilities. Its 7-stop In-Body Image Stabilization (IBIS) allows for steady handheld shooting, even in low-light conditions, reducing the need for tripods.

The camera supports 4K video recording at high frame rates, making it ideal for cinematic content creation. Its robust build quality ensures reliability in diverse shooting environments, and the intuitive control layout provides a professional workflow experience.

## Additional Highlights

- Advanced AF system with subject tracking
- 4K video recording up to 120fps
- Fully articulating touchscreen LCD
- Durable, weather-sealed body
- Supports a wide range of Fujifilm X-mount lenses
- Built-in Wi-Fi and Bluetooth for easy sharing and remote control
- Multiple customizable buttons for a personalized shooting experience
