

Rode NT1 Microphone

Price: PKR 80,000

Key Features

- Low Self-Noise
- Hybrid Connectivity
- Advanced Features

Complete Description

The Rode NT1 is a premium condenser microphone designed for studio recording, offering ultra-low self-noise and exceptional audio clarity. Its hybrid connectivity options allow seamless integration with various recording setups, providing flexibility for professional vocal and instrument recordings.

The NT1 features advanced internal components that deliver a clean and accurate sound, making it suitable for detailed vocal, acoustic instrument, and broadcast applications. Its durable construction ensures long-term reliability and consistent performance.

Additional Highlights

- Studio-quality condenser microphone for vocals and instruments
- Cardioid polar pattern for focused sound capture
- Wide frequency response for accurate audio reproduction
- Comes with shock mount and pop filter for improved recording quality
- Ideal for professional recording studios, home studios, and podcasting
